Values by group

Every item in a group gets the same values.

Column	Support	Training	License
Department	[TBC]	[TBC]	[TBC]
Class	[TBC]	[TBC]	[TBC]
Income account	[TBC]	[TBC]	[TBC]
Deferred Revenue account	[TBC]	[TBC]	[TBC]
Revenue Recogition Rule	[TBC]	[TBC]	[TBC]
Rev Rec Forecast Rule	[TBC]	[TBC]	[TBC]

Department, Class, accounts and rules must match existing NetSuite records, spelled as NetSuite shows them.

Values for all items

Subsidiary	[TBC: which MinIO entity sells these items]
Include Children	[TBC: Yes if child subsidiaries also sell them]
Sales Description	[TBC: repeat the Display Name/Code, or other text]
Base Price	[TBC: list price per item, or blank and priced on each order]
Create Revenue Plans On	[TBC]
Direct Revenue Posting	[TBC: usually No when revenue recognition runs in NetSuite]
Can be fulfilled/received	[TBC: usually No for services and licenses]

Open questions

1. **OEM license.** Does AIStor OEM License use the same accounts and rule as the direct licenses?
2. **Platform training subscription.** Is it recognized like the live trainings or like a subscription?
3. **Base Price.** Do these items have list prices?
4. **Template header.** The template spells `Revenue Recogition Rule`. Kept as is; it only needs to match when mapping the import.
