NetSuite vendor load

Vendor import: MINIO_Vendor_Template_10192026.xlsx

Overview

Template	MINIO_Vendor_Template_10192026.xlsx from SOA: 61 columns, tabs Field Restrictions, Vendor Template, Vendor Category
Required	Company Name (marked red). First and Last Name are required instead when the vendor is an individual
Source of truth	Sage Intacct vendor detail export, 1,770 active vendors
Enrichment	Ramp vendor export, 578 vendors. 551 carry the Sage vendor ID, so the link is exact
Not loaded	Bank details (ACH and wire). The template has no bank fields
Review table	Every active Sage vendor mapped to the template, with Ramp coverage and flags: https://claude.ai/artifact/43aBdfBgsyuiGNHAtGPSsw
Status	Scope and rules agreed 2026-10-26. Load plan and remaining questions below

Column mapping

Same approach as the customer load: Sage first, Ramp fills gaps, rules marked as rules.

Template column	Field	Source
ExternalID	externalId	Same as Vendor ID
Vendor ID	vendorId	Sage vendor ID. V-##### kept; older V##### (339) and Ramp-created RMP_# (37) get the next numbers after V-01768, from V-01769. NetSuite auto-numbers new vendors after the last loaded number
Individual	isPerson	Sage “This vendor is an individual person” (34 are)
First Name, Middle Name, Last Name	firstName, middleName, lastName	Sage contact name, individuals only
Company Name	companyName	Sage vendor name. Required
Vendor Category	category	Sage vendor type, mapped to the template list: AR reseller to AR Reseller, Tax to Tax agency, MinIO employee to MinIO Employee. 922 vendors have no type

Template column	Field	Source
Primary Subsidiary	subsidiary	MinIO, Inc. [TBC: 9 INR vendors and 1 SGD vendor may belong to MinIO Pvt. Ltd. or MinIO Singapore Pte. Ltd.; see open questions]
Phone, Fax	phone, fax	Sage, else Ramp contact phone
Email	email	Sage email, else Ramp contact email. Field holds 300 characters
Comments	comments	Sage comments
Email Preference, Send Transaction Via Email / Fax / Print	emailpreference, emailTransactions, faxTransactions, printTransactions	Blank, NetSuite defaults
Address 1 (Label, Attention, Addressee, Phone, Address 1 and 2, City, State, Zip, Country, Default Shipping, Default Billing)	address1_*	Sage pay-to address, else primary contact address, else Ramp check mailing address. Label “Remit-to”, Default Billing TRUE
Address 2 (same fields)	address2_*	Sage return-to address where different from address 1. Label “Return-to”, Default Shipping TRUE
Legal Name	legalName	Ramp vendor legal name (149), else Sage 1099 name
Account	accountNumber	Sage “Number”: the account number the vendor assigned to MinIO (26 vendors)
Terms	terms	Sage term, else Ramp net terms, mapped to the NetSuite list (Due on Receipt, Net 10, Net 15, Net 30, Net 45, Net 60, Net 150). 132 vendors have terms in Sage
Default Expense Account	defaultExpenseAccount	Sage default expense account, mapped through the Sage# column of COA Draft v1 (for example Sage 62000 to 62600 Consultants). Set on 109 vendors; 2 Sage accounts have no mapping
Default Payables Account	defaultPayablesAccount	20100 Accounts Payable - Trade
Credit Limit, Incoterm	creditLimit, incoterm	Blank. Sage has none
Tax ID	taxIdNum	Sage tax ID (232), else Ramp TIN (140). In the load file; masked to the last 4 digits on review pages
1099 Eligible	is1099Eligible	TRUE when Sage has a Form 1099 type (21) or the vendor type is 1099 Vendor (88)
Vendor Bill tolerances (6 columns)	purchaseorder*, receipt*	Blank. MinIO does not use purchase orders or item receipts
Primary Currency	currency	Sage default currency, else USD
Additional Currency 1, 2	additionalCurrency1, 2	Blank

Template column	Field	Source
Legacy Vendor ID	Legacy Vendor ID	Sage vendor ID as it is in Sage
Source System	Source System	Sage Intacct, or “Sage Intacct; Ramp” where Ramp filled a value

Added columns

Not in the template, kept as on the customer load. Source IDs, as custom fields: Sage Vendor ID (as in Sage, also in the template’s Legacy Vendor ID) and Ramp Vendor ID. For review only: Question Categories, Duplicate Action, Ramp Category, Owner, Department, Last activity (latest of Sage last bill, Sage last payment, Ramp last spend), Ramp 365-day spend, Flags.

Scope

Sage has 1,770 active vendors, but most have no recorded activity. Activity is the latest of Sage last bill, Sage last payment and Ramp last spend.

Activity	In Ramp	Not in Ramp	Total
Since 2024-10-26	478	85	563
Before 2024-10-26	8	292	300
None recorded	65	842	907
Total	551	1,219	1,770

Sage vendor type	Vendors	Never billed in Sage
Blank	922	565
Credit Cards	427	418
MinIO employee	136	62
AR reseller	127	125
1099 Vendor	88	17
Tax	28	15
Other types	42	18

The export of all active vendors lists 1,775. The 5 not in the detail export are flagged One-time use in Sage. The Sage vendor list report has 1,788: the 1,775 plus 13 inactive.

27 Ramp vendors have no Sage vendor, for example KPMG LLP, Baker Botts LLP, Oracle America and Navan.

Load plan

Agreed 2026-10-26: every active Sage vendor ends up in NetSuite, with Ramp syncing its vendors.

1. **Ramp sync.** Ramp syncs its 578 vendors to NetSuite, including the 27 Ramp vendors not in Sage (added in Ramp from 2025-08 on, 23 with no spend yet).

2. **Sage vendors not in Ramp.** This load: the 1,219 active Sage vendors that are not in Ramp, mapped as above.
3. **Enrichment.** The 551 vendors in both systems get Sage values Ramp does not hold: Sage Vendor ID, Vendor Category, default expense account, 1099 flag, tax ID where Ramp has none, and bank details where Ramp has none.

Bank details

	Vendors
ACH details in Sage	164
ACH details in Ramp (vendors with a Sage ID)	174
In both	70 (last 4 digits agree on 65, differ on 5)
Sage only	94 (13 in Ramp without bank details, 81 not in Ramp)
Ramp only	104

Ramp's details are the more recent where both exist. The vendor template has no bank fields, so bank details need their own NetSuite import (vendor bank details record), from Sage for the 94 and from Ramp for the rest if Ramp does not sync them.

Vendor types against Ramp

Sage vendor type	Vendors	In Ramp	Note
Credit Cards	427	123	"Never billed" means no AP bill in Sage: card purchases are booked from the card feed, not as bills. 122 of the 123 in Ramp have Ramp spend. The other 304 are card merchants from before Ramp, plus the card accounts themselves (for example Mastercard - 3584, CHASE CC - ALL CREDIT CARDS)
MinIO employee	136	1	74 were reimbursed through Sage bills. Ramp reimbursements sync to NetSuite as vendor bills with the employee as the vendor (or one default reimbursement vendor), so employee vendor records are the right home
AR reseller	127	9	2 billed in Sage

Open questions

1. **Order of Ramp sync and load.** Ramp's NetSuite sync works both ways: it can import existing NetSuite vendors and link Ramp merchants to them. Loading all 1,770 Sage vendors first and then connecting Ramp avoids two problems with syncing first: Ramp-created vendors carry no Sage ID, so the enrichment step has to match by name, and Ramp names that already exist in NetSuite raise duplicate-name errors. Which order does SOA recommend?
2. **Subsidiary for INR and SGD vendors.** Ramp supports several entities mapped to NetSuite subsidiaries, but Ramp's export shows only MinIO, Inc. as a default entity (79 vendors, the rest blank). Vendors to look up: INR: V-01301 TDS Tax Payable, V-01311 Universal Actuaries and Benefit Consultants, V-01352 and V-01353 Zoho Corporation Private Limited, V-01354 91 Springboard Business Hub Private Limited, V-01380 Resurgent India Limited, V-01381 National Securities Depository Limited, V-01412 S P

Nagarajan, V-01459 Vishnu Daya & Co LLP. SGD: V-00628 Cloud Expo Asia Pte. Ltd. Also GBP: V-00629 Reed Exhibitions Ltd. Several INR vendors have United States as their Sage country.

3. **Bank details import.** SOA to provide the template for vendor bank details, and confirm whether Ramp syncs bank details to NetSuite.
4. **Five bank accounts differ** between Sage and Ramp. Ramp is assumed current; confirm.
