Values by group

Every item in a group gets the same values.

Column	Support	Training	License
Department	[TBC: see open questions]	[TBC]	[TBC]
Class	Support	Training	License
Income account	41200 Support Revenue	42200 Training Revenue	41100 License Revenue
Deferred Revenue account	[TBC: 23100 Deferred Revenue - ST?]	[TBC]	[TBC]
Revenue Recogition Rule	[TBC]	[TBC]	[TBC]
Rev Rec Forecast Rule	[TBC]	[TBC]	[TBC]

Department, Class, accounts and rules must match existing NetSuite records, spelled as NetSuite shows them.

Values for all items

Subsidiary	MinIO, Inc., the parent of MinIO Pvt. Ltd. and MinIO Singapore Pte. Ltd.
Include Children	Yes, so all three subsidiaries can sell the items
Sales Description	[TBC: repeat the Display Name/Code, or other text]
Base Price	[TBC: list price per item, or blank and priced on each order]
Create Revenue Plans On	[TBC]
Direct Revenue Posting	[TBC: usually No when revenue recognition runs in NetSuite]
Can be fulfilled/received	[TBC: usually No for services and licenses]

Open questions

1. **Department.** 4000 Cost of Revenue (COR) is a cost department and a parent with no people. Coding revenue to it puts revenue and cost of revenue in one department on department reports. Options: leave Department blank on the items (Class already carries the revenue type), use 4000, or use 2000 Sales.
2. **Deferred Revenue account.** COA Draft v1 has 23100 Deferred Revenue - ST, 23200 Deferred Revenue - LT, and under 23200: 23210 Deferred Revenue Unbilled, 23220 Deferred Revenue Billed, 23230 Deferred Revenue Paid. Which one do the items post to?
3. **Account format.** The CSV uses number and name, such as `41100 License Revenue`. Confirm on a test import that NetSuite matches it; child accounts may need the full path.
4. **OEM license.** Does AIStor OEM License use the same accounts and rule as the direct licenses?
5. **Platform training subscription.** Is it recognized like the live trainings or like a subscription?
6. **Base Price.** Do these items have list prices?
7. **Classes in production.** License, Support, Training and Professional Services must exist in production before this load.
8. **Not in this load.** The Items tab lists Surcharge Fee for Marketplace and Reseller Margin (presented as a discount) as TBD. No Professional Services SKUs yet; 42100 Professional Services Revenue is ready when there are.
9. **Template header.** The template spells `Revenue Recogition Rule`. Kept as is; it only needs to match when mapping the import.
